Week 9: Staff need judgment, adaptability and AI-checking skills

Weekly evidence artifact · Week 9 · Trimester 1, 2026

1. Theory anchor

Capability framework: human, meta and digital skills [4] [5].

2. Artifact

Capability	Example at Kazatomprom
Human	Ethical judgement on delays and groundwater
Meta	Adapting when routes close
Digital	Checking AI ETAs, dosing alerts and ratios

3. Company A vs. Company B insight

Reports show falling demand for routine clerical tasks [4] [5]; Cameco’s robots also change roles [3].

4. Transfer verdict

Adopt targeted retraining for engineers and analysts.

5. Evidence + verification

Skills evidence [4] [5]. These are general labour-market findings, not Kazatomprom data.

6. Mini-recommendation

HR with the Lead Engineer should train staff to verify AI outputs; progress signal: share of staff trained.

7. Learning progression & AI disclosure

I used to see jobs as lost or kept. Now I see them as changed. AI helped me find the capability categories; I linked them to the case.

Companies: Cameco (A) and NAC Kazatomprom JSC (B). Source numbers [n] refer to the Evidence page of the ePortfolio.
Proposed targets and thresholds are design assumptions and pilot targets, not verified Kazatomprom data.
